PROBLAM STATEMENT

Develop a personal portfolio website for presenting the profile, skills, projects, and contact details of an individual using HTML and Tailwind CSS.

The website should:

Contain a navigation bar that links to different sections (Home, About, Projects, Contact).

Include a Home section introducing the developer.

Provide an About section with a short biography and skills.

Showcase projects in a Projects section using responsive cards.

Offer a Contact section with a form for visitors to send messages.

Be responsive, modern, and visually appealing with Tailwind CSS styling.

PROJECT OVERVIEW

This project is a personal portfolio website built using HTML and Tailwind CSS. It includes four sections:

Home – introduction of the developer

About – short details and skills

Projects – list of sample projects

Contact – a form to send messages

END USERS

Students – to showcase their skills, projects, and achievements online.

Job Seekers – to present their portfolio to recruiters and hiring managers.

Freelancers – to display their work and attract clients.

Professionals – to build a personal brand and share experience.

Visitors/Clients – who want to view the developer's profile, projects, and contact details.

TOOLS AND TECHNOLOGIES

HTML5 – for creating the structure of the website

Tailwind CSS – for styling and responsive design

JavaScript (optional) – for adding interactivity (like form handling or smooth scrolling)

Text Editor / IDE – e.g., VS Code for writing code

Web Browser – e.g., Chrome/Edge/Firefox for testing and viewing the site

PORTFOLIO DESIGN AND LAYOUT

- 1. Home – Introduction and welcome message**
 - 2. About – Short bio and skills**
 - 3. Projects – List of projects with links**
 - 4. Contact – Simple contact form**
 - 5. Footer – Copyright text**
-

FEATURES AND FUNCTIONALITY

Navigation Bar – allows users to move to different sections (Home, About, Projects, Contact).

Home Section – introduces the developer with a welcome message.

About Section – displays a short bio and skills.

Projects Section – showcases sample projects in a card layout with links.

Contact Section – provides a form for visitors to send messages.

Responsive Design – works on desktop, tablet, and mobile screens.

Dark Theme UI – modern and visually appealing look using Tailwind CSS.

RESULTS AND SCREENSHOTS

CONCLUSION

This portfolio website is created using HTML and Tailwind CSS.
It gives a clean and simple design to showcase
personal details, education, skills, projects, and contact information.
It is useful as a digital resume for students and professionals.
